B-ROADS

Skip the motorway.
Take the B-road.

The navigation and group-drive app built for car clubs and driving enthusiasts. Find the roads worth driving, drive them together, and share the moments along the way.

INTRODUCTION For car clubs, partners and investors

WHY B-ROADS

Navigation apps are built to get you there fast. Enthusiasts want the drive to be the point.

Built for commuters

Mainstream maps send everyone down the fastest road: motorways, toll roads and traffic. The winding country roads that make a drive memorable never get suggested.

Group drives run on chat threads

Clubs organise convoys through messaging groups and shared pins. Cars split at junctions, someone always takes a wrong turn, and no one knows who has arrived.

The moment gets lost

Pit-stop photos get posted hours later, if at all, without the story of where the group stopped or how the drive went.

> B-Roads is built around the drive itself, not just the destination.

MEET B-ROADS

Think of it as Waze for driving enthusiasts, focused on three things done well.

Find the back roads

Choose where you're starting and where you're heading. B-Roads avoids motorways and toll roads, and picks out the twisty, scenic routes worth driving.

Drive together

Start a group drive and share a code. Everyone sees the group live on the map, and each driver's time from start to finish is recorded automatically.

Share the stop PREMIUM

Snap a photo at a pit stop. It's stamped with where you are and how the drive is going, ready to post to Instagram or Facebook in one tap.

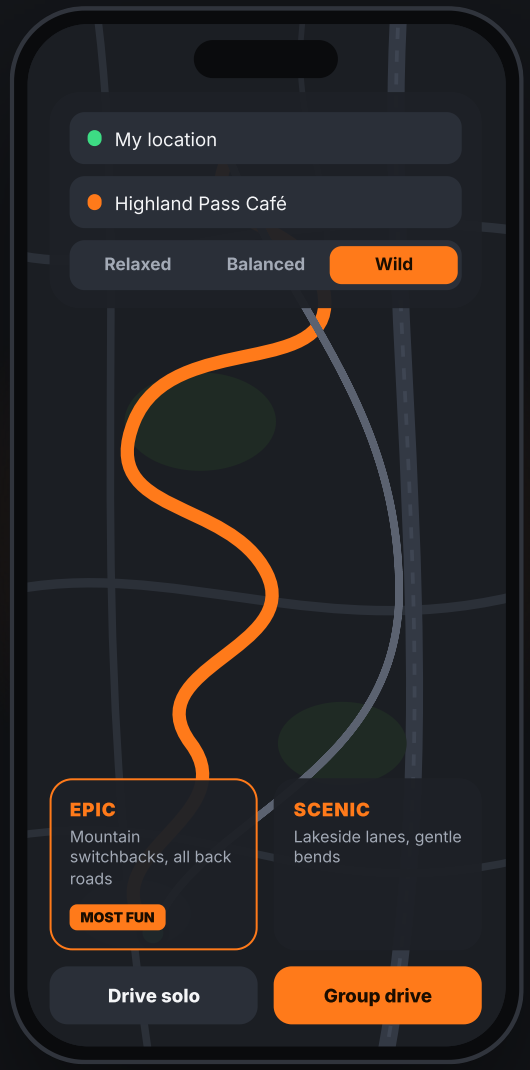

WHO IT'S FOR

- Car clubs and owners' groups
- Weekend and solo drivers
- Drive and tour organisers
- Automotive brands and events

FEATURE ONE

Routes picked for the drive, not the commute.

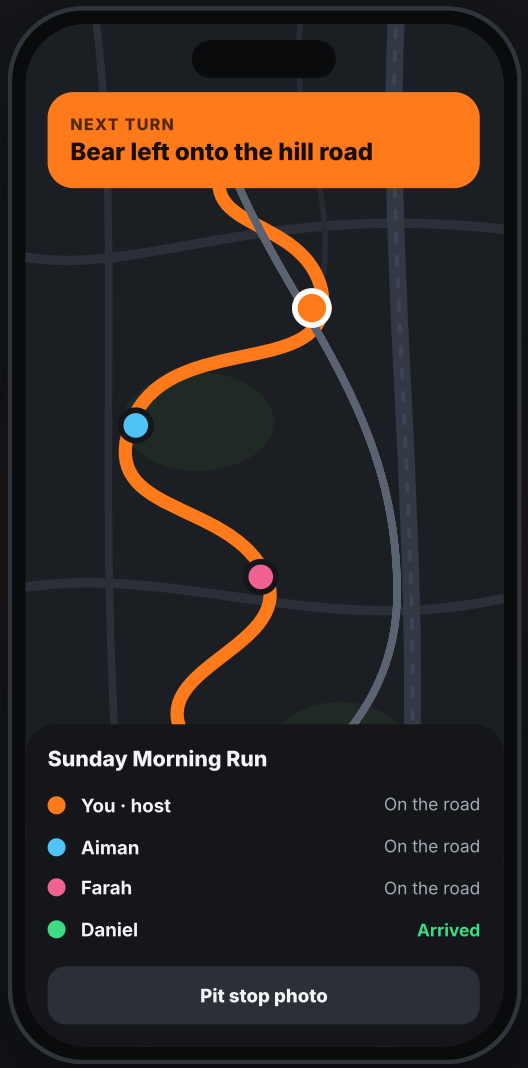

- **Set a start and a destination.** Search any place, or start from where you are now.
- **Motorways and tolls are avoided.** B-Roads favours back roads and only uses big roads as a last resort.
- **Every route option is rated.** Each alternative is scored on how twisty it is and how much of it stays on back roads. The best one is flagged **Most fun**.
- **Pick your mood.** Relaxed for a scenic cruise, Balanced for most days, or Wild for the twistiest roads around.
- **Turn-by-turn guidance.** The next turn is always on screen, with a warning if you leave the planned route.

FEATURE TWO

Group drives without the chaos.

- **Create a drive.** The organiser picks the route and gets a short drive code.
- **Share the code or invite link.** Members join from the meeting point with one tap.
- **Drive together, live.** Everyone sees every car on the map and how far each driver has left to go. If someone loses signal, they rejoin automatically.
- **Arrive and compare.** The clock starts when the organiser starts the drive and stops for each driver as they reach the destination. Once everyone is in, a results board shows each driver's time.
- **Solo runs count too.** Drive a route alone and your time is still recorded.

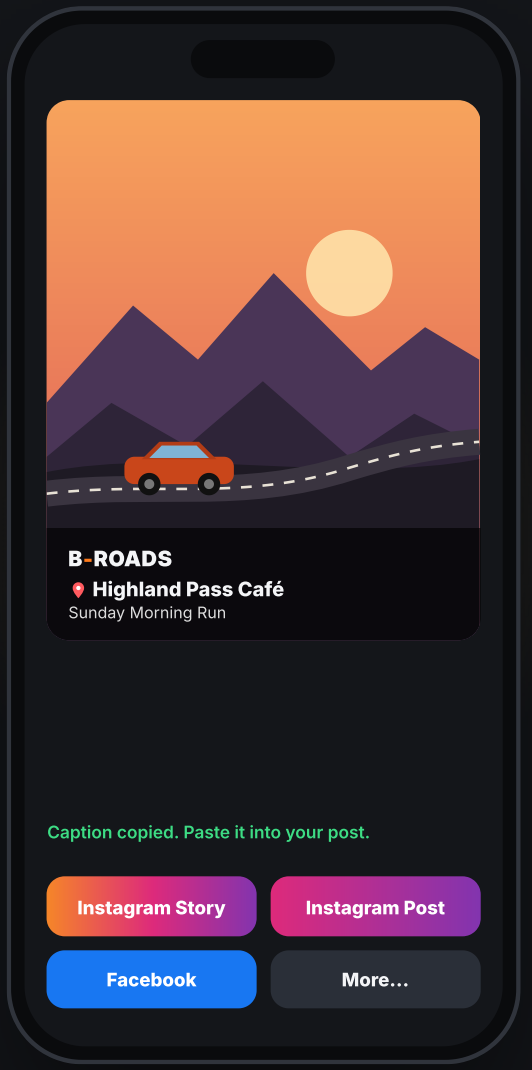

FEATURE THREE · PREMIUM

Every pit stop, shared in seconds.

- **Snap it in the app.** No switching between camera, gallery and social apps.
- **Stamped automatically.** The photo shows where you've stopped, the drive name and how long you've been on the road.
- **One tap to post.** Send it straight to an Instagram Story, an Instagram post or Facebook. A caption with the location is ready to paste.

What you get	Free	Premium
Back-road routing and guidance	●	●
Live group drives and timing	●	●
Pit stop camera with location stamp	-	●
One-tap Instagram and Facebook posting	-	●

WHERE WE ARE AND WHERE WE'RE HEADING

In development today, with a clear road ahead.

Today

B-Roads is in development for iPhone and Android. The core features are being built now: back-road routing, live timed group drives and pit stop sharing. Road testing with drivers comes next.

Next on the roadmap

- Spoken turn-by-turn directions and automatic rerouting
- Tracking that keeps running in the background
- Club profiles, member lists and drive history
- Saved and shared favourite routes
- Partner stops: cafés, workshops and events

Get involved

Car clubs: join our first road tests, help shape the features your club needs, and get early access.

Investors and partners: we're looking for partners to take B-Roads from prototype to launch. Let's talk.

B-ROADS
Skip the motorway. Take the B-road.
